DETAILED ACTION

Prelim./Amdt.

1. Receipt is acknowledged of the Amendment filed 09/07/2004.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Achari et al. (US 6,168,725 B1) in view of Kamada et al. (USPT 6,331,063 B1).

Re claims 1-23: Achari discloses a method for forming a reflective aperture in a circuit board, said method comprising providing a layered metal substrate having a top metal layer (a Cu pattern in Fig. 1), a middle metal layer (AL foil), and a bottom metal layer (Cu pattern), applying a layer of masking material on a surface of top metal layer of said layered metal substrate; exposing said layered metal substrate to an etching process; removing said masking material from said top metal layer of said layered metal substrate to expose reflective areas of said layered metal substrate (See Fig. 1 and col. 4, lines 7-35). Achari does not disclose a light source and a method of positioning the light source in the reflective aperture. However, Kamada teaches that an LED (1) is mounted in the dents (11) of the substrate (10). It would have been obvious to one having ordinary skill in the art at the time the invention was made to mount a light source such as an LED on Achari's reflective aperture as taught by Kamada since it was known in the art that LED chip have been mounted on a substrate.

Response to Arguments

4. Applicant's arguments, filed 09/07/2004, with respect to the rejection(s) of claim(s) under 35 U.S.C. 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Achari et al. and Kamada et al. (USPT 6,331,063 B1) as discussed above.
